DEPARTMENT OF TRADE, INDUSTRY AND COMPETITION

NOTICE 4244 OF 2026

INTERNATIONAL TRADE ADMINISTRATION COMMISSION

NOTICE OF THE CONCLUSION OF A SUNSET REVIEW OF THE ANTI-DUMPING DUTIES ON STRANDED WIRE, OF IRON OR STEEL, NOT ELECTRICALLY INSULATED, OF A DIAMETER OF 12,7 MM OR MORE (EXCLUDING THAT OF WIRE OF STAINLESS STEEL, THAT OF WIRE PLATED, COATED OR CLAD WITH COPPER AND THAT IDENTIFIABLE AS CONVEYOR BELT CORD) CLASSIFIED UNDER TARIFF SUBHEADING 7312.10.17, ORIGINATING IN OR IMPORTED FROM THE PEOPLE'S REPUBLIC OF CHINA

The International Trade Administration Commission of South Africa ("the Commission") conducted a sunset review investigation of the anti-dumping duties on stranded wire of iron or steel, not electrically insulated, of a diameter of 12,7 mm or more (excluding that of wire of stainless steel, that of wire plated, coated or clad with copper and that identifiable as conveyor belt cord) classified under tariff subheading 7312.10.17 ("stranded wire" or "the subject product") originating in or imported from the People's Republic of China ("China").

The investigation was initiated after the Commission considered that the Applicant had submitted *prima facie* information to indicate that there is a likelihood of the continuation of dumping and the continuation or recurrence of material injury to the Southern African Customs Union ("SACU") industry should the current anti-dumping duty expire.

After considering comments to the essential facts letters, the Commission made a final determination that the expiry of the anti-dumping duties on the subject product originating in or imported from China would likely lead to the continuation of dumping and the continuation or recurrence of material injury, and therefore decided to recommend to the Minister of Trade, Industry and Competition that the current anti-dumping duties on stranded wire be maintained.
